Abstract

Systems Engineer or Computer Engineer graduated in 2010, developer by passion and conviction, I identify myself as a creative person, responsible, autonomous but with the ability to work together to take forward the challenges that are presented to me or to the working group in the software development process using modern technologies.

I lived in different cities and countries, shared with partners from different places of the world and that experience is really valuable for me because it allowed to me work with different cultures and enrich my experience and perspectives around teamwork.
